

Service Information

Australian virtual mobile numbers look just like regular Australian mobile numbers (starting with 04) but work entirely over the internet—no physical SIM or eSIM required. Calls are routed through our cloud-hosted VoIP PBX, following the call flow you configure. You can make and receive calls on any VoIP-compatible device (requires Hosted PBX or SIP Trunk service) using your internet connection or forward them to an external number.

Online SMS allows you to send and receive messages through an SMS-enabled phone number using an internet connection. Messages are sent using Webphone on your browser or desktop app (sending messages from mobile app - coming soon).

Included features

Australian virtual mobile

A full call routing feature set is included; IVR menus, call queues, ring groups and more. We constantly expand our feature set, view the complete feature list [here](#). Customers have access to an online portal to configure their hosted PBX service call flow and check usage information.

Online SMS

- Forward incoming messages to email.
- Send and receive SMS using Webphone on your browser or desktop app (sending messages from mobile app - coming soon).
- Users can choose and switch between multiple numbers for their sender ID if they have those numbers assigned.
- Personalize messages with emojis.
- Inbound SMS delivery to multiple users at once (coming soon).

More SMS features are on the way, including removing some current service limitations. Customers have access to an online portal to manage their SMS service and track usage information.

Requirements and limitations

- An active internet connection is required.
- Call quality is dependent on the quality and stability of your internet connection.
- VoIPcloud does not provide access to premium call or SMS services such as 1900 numbers and 19 SMS services used for content delivery.
- Caller ID cannot be guaranteed to international destinations.
- The service doesn't include battery backup for NBN or customer equipment. This means that during a power outage you will not be able to make calls or use SMS services. Emergency calls and messages, won't be available.
- SMS and virtual mobile services are not available in trial mode.
- Standard SMS messages are limited to 160 characters. When using emojis, the limit is 70 characters, with each emoji generally counting as two characters. If your message exceeds these limits, it

will be split into multiple SMS. The maximum length for any message is 480 characters.

- An SMS-enabled number is required to send and receive messages. To send SMS, you'll also need a User and Webphone license.
- The SMS-to-email service can be activated with just an SMS-enabled number.
- SMS-enabled phone numbers must be active on the VoIPcloud network. Custom caller IDs outside of the VoIPcloud network aren't permitted as sender IDs.
- Each SMS-enabled phone number can be linked to one User.
- Sending SMS with text-based or alphanumeric sender IDs is not supported by this service.
- SMS sender IDs may not be received for some destinations, including international, and may be replaced with a shared number.
- This SMS service is designed for standard person-to-person communication, and application-to-person message sending is not supported. Sending bulk or large-volume messages is not supported.
- Sending multimedia messaging services (MMS) is not supported by this service.
- This service doesn't support Webphone on mobile app (coming soon).
- We cannot guarantee successful SMS delivery of one-time passwords (OTPs) for authentication. Some senders may block virtual mobile numbers for security reasons, which is beyond our control.

Pricing and Billing Information

All pricing is AUD and includes GST.

SMS plans	PAYG*	Special*
AU Virtual mobile number	\$7.95 per month	\$7.95 per month
SMS plan	\$0	\$10 per month

Outbound SMS rates to International numbers	Varies	Varies
Outbound call rates, call diversions and call plan monthly fees	See Hosted PBX or SIP trunk call plans#	See Hosted PBX or SIP trunk call plans#

*All SMS and call plans and services are subject to our [fair use policy](#).

#For details on call plan pricing, call diversions and outbound call rates see our Hosted PBX or SIP trunk call plans and their critical information summary documents.

SMS Partner integrations

You can connect your SMS-enabled number with one of our integration partners ([touchSMS](#), [edgility](#)) to unlock a suite of additional SMS capabilities and features, including bulk SMS messaging. See their websites for more information.

Advanced features

Fax-to-email is \$9.00 per fax-to-email PBX object per month. Integrations (CRM, API, Webhooks, Zapier) are \$4.40 per user per month. All integration features are activated with one subscription for the entire account, with pricing calculated automatically based on user count. Call recording storage plans can be selected for your call recordings, with subscriptions paid monthly or pay-as-you-go.

Additional pricing information

Minimum term: one month and no early termination fees. If included call, SMS, or call recording storage value is fully used within a calendar month, excess usage charges will apply. Any unused value does not roll over to the next month. You'll need an SMS-enabled phone number. There's a \$22 activation or porting fee for each Australian virtual mobile number, and if porting is rejected due to incorrect information, a \$18 rejection fee may apply. You can find details about monthly and activation fees for other SMS-enabled numbers in the customer portal. Go to the services tab, then the phone numbers section, you will find prices under the order new numbers tab. Information about porting fees and rejection fees is available in the services tab, under the number porting section. Use the new porting button to view prices. If a number is removed or cancelled from your account, reactivation may incur a fee. Contact support to request reactivation, and they'll confirm any charges before proceeding.

International SMS destinations

International outbound SMS rates can be found under the rates search section inside the customer portal. International outbound SMS rates are subject to change without notice and are charged per outbound SMS.

Billing information

Services are supplied on a prepaid basis by default. New monthly subscription services are charged to your account pro-rata, from the service activation date to the end of that month. Any included value for services is also applied to your account proportionally for the same period. After this, your monthly subscription is charged at the start of each month. Calls and SMS charges that are not part of the included value are charged to the account balance after the message is sent, making it possible for the account balance to go negative or below the assigned credit limit. Services unsubscribed during a billing period are non-refundable. We recommend setting up automatic payments via our customer portal. Pre-paid billing requires you to maintain a positive account balance at all times, the service will be restricted automatically if you fail to maintain a

positive account balance. Post-paid billing is available upon request and at VoIPcloud's discretion. For post-paid billing, invoices are issued at the start of each month with 14-day payment terms. A security deposit is required to set a credit limit, and VoIPcloud may ask for an additional deposit if you need a higher credit limit. Non-payment and service suspension charges apply to post-paid billing accounts only. If your bill is overdue for over 7 days your account will be charged a \$15 late payment fee. If your bill is overdue for over 30 days your account will be suspended and if your account is restored a \$50 suspension fee upon restoration.

Customer Service Information

Our Australian-based team can help you with technical support, account or sales questions. Give us a call at 03 906 77700, or email us at support@au.voipcloud.online. Support hours are listed on our website.
